SPECIFICATION.

K-Tech fork springs are manufactured from the highest grade Chrome Silicone wire, each spring is cold coiled, heat treated, pre set and ground to length before being polished for ultimate performance. All springs have their rate laser etched on the end and are manufactured to DIN 2095 grade1.

All springs are

- Cold Coiled
- Ground Ends
- Heat Treated
- Tempered
- Shot Peened
- Polished for smoother performance
- Part Numbered

HPSS
HIGH PERFORMANCE SHOCK SPRINGS

SPECIFICATION.

K-Tech shock springs are manufactured from the highest grade Chrome Silicone wire, each spring is cold coiled, heat treated, pre set and ground to length, they then have a phosphate coating applied to protect from corrosion and then powder coated before the part number being printed onto them. All springs are manufactured to DIN 2095 grade1

All springs are

- Cold Coiled
- Ground Ends
- Heat Treated
- Tempered
- Shot Peened
- Zinc Phosphate
- Epoxy Powder Coated
- Part Numbered

NOK

SPECIFICATION.

K-Tech front fork dust seals are manufactured by NOK and are a direct replacement for the original equipment parts. NOK are chosen as original equipment by all Japanese suspension manufacturers for their quality and durability. All dust seals are supplied in pairs and available for most fitments.

SPECIFICATION.

K-Tech front fork guide bushes are a direct replacement and manufactured to the exact standards of the original equipment parts. They are manufactured from a hardened steel and coated with copper for protection against outside elements, the wearing surfaces are a PTFE material designed to give low friction on the movement of the front fork. All guide bushes are supplied in pairs and available for most fitments.

SPECIFICATION.

K-Tech front fork slide bushes are a direct replacement and manufactured to the exact standards of the original equipment parts. They are manufactured from a hardened steel and coated with copper for protection against outside elements, the wearing surfaces are a PTFE material designed to give low friction on the movement of the front fork. All slide bushes are supplied in pairs and available for most fitments.

SPECIFICATION.

K-Tech **SSK** piston kits are available to fit most front fork cartridge damping systems and have been designed for road and track use to give enhanced damping control over the original equipment giving comfort and confidence to the rider.

The SSK piston kits are only available through authorised K-Tech dealers that have been trained to install them as there are specialist tools and techniques required to guarantee performance and safety of this product.

SPECIFICATION.

K-Tech **SSRK** piston kits are available to fit most front fork cartridge damping systems and have been designed for track use to give enhanced damping control over the original equipment giving a race level performance. It is advised that these piston kits should not be used for normal road riding conditions.

The SSRK piston kits are only available through authorised K-Tech dealers that have been trained to install them as there are specialist tools and techniques required to guarantee performance and safety of this product.

SPECIFICATION.

K-Tech shock absorber service kits are supplied with an oil seal, dust seal, piston rod bush and most o-rings needed to service the shock absorber. All of the service parts are either equal or exceed the quality of the original parts. Most service kits are supplied with a new piston rod lock nut for added security when rebuilding the shock absorber.

SPECIFICATION.

K-Tech **IDS** (Independent Damping System) fork cartridges are designed to fit into original equipment front forks that do not allow for compression adjusters to be fitted into the bottom of them. The IDS cartridges are adjustable for independent compression and rebound damping and spring preload.

The IDS cartridges are only available through authorised K-Tech dealers that have been trained to install them as there are specialist tools and techniques required to guarantee performance and safety of this product.

- 30 clicks compression adjustment.
- 30 clicks rebound adjustment.
- 18mm preload adjustment.

Springs must be ordered separately with cartridges.

SPECIFICATION.

K-Tech **RDS** (Rod displacement damping system) fork cartridges are designed to fit into original equipment front forks. Designed and manufactured in the UK using the highest grade materials and processes available the RDS system uses a 14mm piston rod and 25mm control piston to give a big displacement of oil and greater damping control, giving the rider a race level performance from his original equipment forks.

The RDS cartridges are only available through authorised K-Tech dealers that have been trained to install them as there are specialist tools and techniques required to guarantee performance and safety of this product.

- 24 clicks compression adjustment.
- 30 clicks rebound adjustment.
- 18mm preload adjustment.

Springs must be ordered separately with cartridges.

SPECIFICATION.

K-Tech **DDS** (Direct Damping System) fork cartridges are replacement damping system designed to fit into original equipment front forks for use at the highest levels of racing. Designed and manufactured in the UK using the highest grade of materials and processes the DDS cartridges are a pressurised damping system using 20mm displacing pistons to create a high flow of oil through 31mm control pistons to give precise damping control. The DDS cartridge has separate damping circuits with the compression damping being controlled in the left hand fork leg and rebound damping controlled in the right hand leg. The system is pressurised by a spring force which keeps the system very stable under extreme racing conditions. The DDS cartridges are supplied with three pairs of fork springs and the necessary tools needed to change them.

The DDS cartridges are only available through authorised K-Tech dealers that have been trained to install them as there are specialist tools and techniques required to guarantee performance and safety of this product.

- 30 clicks compression adjustment.
- 30 clicks rebound adjustment.
- 18mm preload adjustment.

SPECIFICATION.

KTR-2/FF

KTR-2 OPEN CARTRIDGE FORK

The **KTR-2** front forks use RDS (Rod Displacement Damping system) technology which uses a 14mm piston rod and 25mm control piston to give a big displacement of oil and greater damping control. They share the same high quality materials, processes and machining tolerances as the KTR-3 forks and are aimed at the serious rider that is looking for high level product at a competitive price.

- Lengths available:- 730mm.
- Stroke:- 130mm.
- RDS Damping System.
- Upper tube material 7075-T6.
- Axle brackets material 7075-T6 for maximum strength and durability, suitable for 290 – 320mm disc diameters.
- 24 clicks of compression adjustment.
- 30 clicks of rebound adjustment.
- 18mm of preload adjustment.
- Supplied with three pairs of springs and the necessary tools needed to change them.

KTR3
PERFORMANCE ROAD RACE FORKS

SPECIFICATION.

155-011-730 KTR-3 DDS CLOSED CARTRIDGE FORK 730mm

155-011-750 KTR-3 DDS CLOSED CARTRIDGE FORK 750mm

155-015-770 KTR-3 DDS CLOSED CARTRIDGE FORK 770mm

The KTR-3 forks use DDS (Direct Damping System) technology and have been designed to compete at the highest level of motorcycle racing. Using high quality materials, exacting design tolerances and latest processes and treatments, the KTR-3 front forks are a serious option for any level of rider or race team.

- Lengths available:- 730mm, 750mm, 770mm.
- Stroke:- 130mm.
- Pressurised Direct Damping System.
- Upper tube material 7075-T6.
- Axle brackets material 7075-T6 for maximum strength and durability, suitable for 290 – 320mm disc diameters.
- 30 clicks of compression adjustment.
- 30 clicks of rebound adjustment.
- 18mm of preload adjustment.
- Supplied with three pairs of springs and the necessary tools needed to change them.

SPECIFICATION.

The **DDS 'Lite'** rear shock has been designed for the customer that demands a high level of performance at a competitive price. Sharing all the same high quality parts as the 'Pro' version the DDS 'Lite' performs to the same level but does not come with hydraulic spring preload adjustment or the 'unique' Bypass Valve adjustment as standard but can be upgraded at a later date.

SPECIFICATION.

The **DDS 'Pro'** rear shock has been designed for use at the highest level of racing and developed in major championships around the world. Like all other K-Tech products it has been designed and manufactured using the latest design software, highest grades of material, machining and material processes available. As you would expect from a high quality racing product, the DDS 'Pro' comes with 32 clicks of compression and rebound damping adjustment, 16 clicks of low speed (Bypass Valve) adjustment, 6mm of length adjustment and 10mm of hydraulic spring preload adjustment.

More fitments coming in 2015

Refinement, control, stability and style comes as standard with the K-Tech Tracker front fork cartridges that are aimed at the custom/classic motorcycle owner. The Tracker cartridges come with external adjustment for spring preload, compression and rebound damping allowing the rider to adjust the forks for all types of riding styles and conditions.

- Increased comfort and control.
- External independent adjustment for compression and rebound damping.
- External spring preload adjustment.
- Optional spring rates.
- Fits into original equipment front forks

The K-Tech Bullit is a new innovative shock absorber that incorporates the latest damping technology along with keeping the original look familiar with the custom bike owner.

The springless design allows a classic "strut" type look without compromising on ride quality. This high technology shock absorber is nitrogen charged to give constant damping control under all riding conditions.

- Increased comfort and control
- Forged aluminium parts.
- Nitrogen filled N₂.
- Patented design.
- Available in different piston rod colours (Gold, Black and Chrome).
- Available in different lengths.
- Simply bolts on to replace original equipment.

SPECIFICATION.

K-Tech fork springs are manufactured from the highest grade Chrome Silicone wire, each spring is cold coiled, heat treated, pre set and ground to length before being polished for ultimate performance. All springs have their rate laser etched on the end. All springs are manufactured to DIN 2095 grade 1

All springs are

- Cold Coiled
- Ground Ends
- Heat Treated
- Tempered
- Shot Peened
- Polished for smoother performance
- Part Numbered

SPECIFICATION.

K-Tech shock springs are manufactured from the highest grade Chrome Silicone wire, each spring is cold coiled, heat treated, pre set and ground to length, they then have a phosphate coating applied to protect from corrosion and then powder coated before the part number being printed onto them. All springs are manufactured to DIN 2095 grade1

All springs are

- Cold Coiled
- Ground Ends
- Heat Treated
- Tempered
- Shot Peened
- Zinc Phosphate
- Epoxy Powder Coated
- Part Numbered

SPECIFICATION.

K-Tech front fork guide bushes are a direct replacement and manufactured to the exact standards of the original equipment parts. They are manufactured from a hardened steel and coated with copper for protection against outside elements, the wearing surfaces are a PTFE material designed to give low friction on the movement of the front fork. All guide bushes are supplied in pairs and available for most fits.

SPECIFICATION.

K-Tech front fork slide bushes are a direct replacement and manufactured to the exact standards of the original equipment parts. They are manufactured from a hardened steel and coated with copper for protection against outside elements, the wearing surfaces are a PTFE material designed to give low friction on the movement of the front fork. All slide bushes are supplied in pairs and available for most fitments.

SPECIFICATION.

The Off Road Damping System **ORDS** has been designed exclusively for Off Road riding conditions. They are designed and manufactured in the UK using the highest quality materials and processes available. The system provides the rider with control and confidence in demanding conditions.

The hydraulic bottoming control gives the rider more comfort when landing from large impact jumps, whilst providing a safe and controlled environment.
